INDEX TO VOLUME 22, 1957

Journal of Speech and Hearing Disorders

Each article is indexed in two ways: it is listed alphabetically by the last name of the author, and it is also classified under a selected group of subject headings. An article may be located either by the author's name or by the subject matter of the article. Many articles are classified under more than one subject heading. The following subject headings are currently being employed in indexing the *Journal:*
